About Me

I am a passionate Software Engineering student at the University of Information Technology, Myanmar. Specializing in full-stack development, I am honing my skills in Java and Spring Boot for backend solutions, and in React along with TypeScript, and Tailwind for responsive frontend applications.

Skills

- React.js
- Html & CSS3
- Javascript & TypeScript
- Java (Spring Boot)
- Critical Thinking
- Problem Solving

Education

- Middle School**
B.E.PS (8) (KG - GVI) 2009 - 2016
During my middle school years, I built a strong foundation in core subjects. I participated in various school activities, which helped me develop teamwork and leadership skills. These formative years inspired my interest in technology and problem-solving. Throughout this time, I consistently ranked among the top four in my class and received academic awards.
- High School**
Pyin Nyar Myinn Mo (GVII - GX) 2017 - 2020
During high school, I dedicated myself to developing my analytical and critical-thinking abilities. I consistently ranked first in my class and earned multiple first-place awards. Additionally, I graduated with the highest marks in my cohort.
- B.C.Sc. (Software Engineering)**
University of Information Technology 2022 - Current
I am currently working toward a Bachelor of Software Engineering, where I am acquiring practical experience in programming, software design, and database management. My studies have encompassed projects related to web development, mobile application design, and data structures. Additionally, I actively participate in hackathons and coding competitions, collaborating with fellow students to create innovative tech solutions.

Achievements

- ITPEC FE Certification
- SkillFront Information Security Certification
- Coursera Certifications
